

# Get It On

## Diffuser

I think I'll be okay another diss, another day  
Left me standing like a stranger without a face  
I think I lost control, I feel my head is in slow mo'

Infatuation leads right to emotion overload  
Temptation, frustration  
I know everybody wants you, it's not a temporary issue

Just once I think I'd like to see you, get it on with me  
I know everybody wants you, it's not a temporary issue

Just once I think I'd like to see you get it on with me  
Get it on with me  
The methods that you used, just make me more and more confused

Anxiety has got me tiptoeing around the fuse  
I'm trying not to bend, I'm playing like I'm hard to get

With all this pressure I will wind up snapping in the end  
Temptation, frustration  
I know everybody wants you, it's not a temporary issue

Just once I think I'd like to see you, get it on with me  
I know everybody wants you, it's not a temporary issue

Just once I think I'd like to see you get it on with me  
I'm in control but you don't know  
Where do we go, go, go?

I know everybody wants you, it's not a temporary issue  
Just once I think I'd like to see you, get it on with me  
I know everybody wants you, it's not a temporary issue  
This time I think I'm gonna see you get it on with me

Get it on with me, get it on with me
