

And I Waited

Hanson

Is there something wrong with the way you feel
Cause you been acting like you're overloaded
You're going on like you got something to prove
 You better keep it in mind
Maybe it's too hot out on the blacktop
 Nobody else is going to save you
You're pretty uptight for being downtown
 I've been up all night
 And I waited
Waited for something to arrive
 Gotta keep this beat alive
 But she keeps me satisfied
 And I waited
Waited for something to be real
When it's pounding in your ear
Doesn't matter what you feel.
Where do we go from here?
 The future's so unclear
 You're such a doll, my dear

Well there's nothing wrong with the way you look
But you've been acting like you're up to no good
You're playing me like I've got nothing to lose
 You better keep it in line
I'm not gonna get off until the last stop
 Nobody else is gonna to save you
 Turn the heat up before the meltdown
 I've been up all night
 And I waited
Waited for something to arrive
 Gotta keep this beat alive
 But she can't be satisfied
 And I waited
Waited for something to be real
When it's pounding in your ear
Doesn't matter what you feel?
Where do we go from here?
 The future's so unclear
 You're such a doll, my dear
