November Sun

Susanna Hoffs

Seven years waiting for the sky to fall
It's like I know you well and not at all
The words that caused you pain
Will wash away in this November rainSeven nights wondering where your heart has gone
And though you're here it's like I am alone
And scared of how we've changed
You've always been my cover in the rainAll I know
Can't let go
I need you now
I need you nowTalking all night going round in turns
Something more than time the candle burns
Until it feels to late
A heart's messed up, all heart's do finally breakWe're on a new road, starting here
We'll walk away from all can doubt
We'll walk away from all this fear
Find a way to work it out
As the sky begins to clearThough it's hard to understand
Mystery and faith go hand in hand
In life we've just begun
You are my only one, November Sun
November Sun
You are the one
