

# Universal Soul

## Samael

Underneath the world built by reason  
Lay the foundations of a different  
Perception  
Putting light on a brand new horizon  
Remodeling our own  
Life's conception  
Opening views of another dimension  
Revealing a home of  
Outstanding proportions  
Radiating from one's own reflection  
Energy's  
Nucleus height density concentration  
Feeling incomplete before the meeting While the rest of me wants to gather Sociability, sensibility  
Clear out charm of world illusions Philanthropy to felicity, so why can't we live with one another  
Dissolved,  
Diluted, restored and regrouped  
Waiting for crystallization  
Reunion of  
Different principles  
Leading to cohesion and different conclusions  
Fundamental  
And perennial  
The law of movement intersideral  
One small  
Step, one giant step,  
Independent and connected  
Thought-  
Omnipotence giving the access  
To your own soul, to other galaxies  
At  
Your own depth, reality  
Subject to hazard  
Susceptibility  
Emotionally, physically  
Bound and tied Understanding before standing  
Always digging your views a  
Little deeper  
Vision and dream accorded with one another Giving an answer to all you wonder  
Sun on your soul is significant to your

Own environment  
See through the night  
With an open mind  
Catch up with the light, your way you'll find  
Feeling  
Incomplete before the meeting  
While the rest of me wants to gather Sociability, sensibility  
Clear out charm of world illusions  
Philanthropy  
To felicity, so why can't we live with one another  
Dissolved, diluted,  
Restored and regrouped  
Waiting for crystallization  
Reunion of different  
Principles leading to cohesion and different conclusions
