

# Black Nights

Lowell Fulsom

{One-two-three-four} Black night, white lights  
Your eyes amplify  
Like a heartbeat  
On the downbeat lover  
Black night, white lights  
On the B-side, I found what I was after Black night, white lights  
You're so crazy nice  
Like a small town  
Filled with scyscrapers  
Black night, white lights  
So divine, take me downtown be my saviour And the whole world is you  
On this black night  
Make everything come true  
Under white lights You're on my radar, on my radar  
With your designer love  
Before things get much crazier  
There's something you should know You're on my radar, on my radar  
With your designer love  
Sometimes when I watch you sleep  
I think I made you up You're on my radar, on my radar  
With your designer love  
Before things get much crazier  
There's something you should know You're on my radar tonight  
You are Black night, white lights  
Your hand is locked in mine  
Like a chain link  
Sealing the exit  
Black night, white lights  
R.G.B.Y. this photo says I'm taken Black night, white lights  
You're so crazy nice  
Like a small town  
Filled with scyscrapers  
Black night, white lights  
So divine, take me downtown be my saviour And the whole world is you  
On this black night  
Make everything come true  
Under white lights You're on my radar, on my radar  
With your designer love  
Before things get much crazier

There's something you should know You're on my radar, on my radar  
With your designer love  
Sometimes when I watch you sleep  
I think I made you up You're on my radar, on my radar  
With your designer love  
Before things get much crazier  
There's something you should know You're on my radar tonight  
You are You're on my radar, on my radar  
With your designer love  
Before things get much crazier  
There's something you should know You're on my radar, on my radar  
With your designer love  
Sometimes when I watch you sleep  
I think I made you up You're on my radar, on my radar  
With your designer love  
Before things get much crazier  
There's something you should know Oh, my radar  
Oh, my radar, tonight
