Lethal Radiation

Love Like Blood

one man - high on a nuclear power station
voluntary - exposed the lethal radiation
somebody wants to die warning the whole nation
somebody wants to cry a warning for the nationwe need another termination
we need another terminationanother day another place, another man is burning
poured himself with petrol for us as a warning
he is a crying flame on a dump in the morning
but nobody will ever change the situation
but his suicide will leave no natural yearning
(for nature)we need another termination
we need another terminationit's 1995 and we still got no solutions
while the nuclear waste still grows
and with it the pollution
is it the government or just
a strange kind of confusion
that we are still not able
to get it in conclusion
somebody tries to call
a warning for the nations
somebody sprayed the wall
warning the whole nations:we need another termination
we need another termination
