

I Love Your Love

Andrea Hamilton

I love your love
Brighter than the beaming of light
True beyond the ticking of time
I love your love

I love your love
Pearly like the stars in the sky
Peaceful like a drive in the night, I
Love your love

And you make me believe
[I can do anything at all]

I love your beautiful embrace
You lead me on and we forget it all besides this place
And that apt look upon your face
You elevate me to some funny-framed peculiar space
I love (ti ti)

I love your love
Without you how could I carry on
All the strength I have would be gone
If I lost your love

But we have won
And all we have to now is sing on
Underneath our blanket of sun
Our sun of love

And you take me away

I love your beautiful embrace
You lead me on and we forget it all besides this place
And that apt look upon your face
You elevate me to some funny-framed peculiar space
Oh how I love
How good and free it feels to be the one you see (wait)
I love your

Bridge:

I love your love
Mmm we belong together that's why
There's nothing quite like you and I
