

How It Feels

[Sophie Zelmani](#)

We are getting there darling
This is you and me
Have you thought about it darling
Have you thought about how it feels I think we've got some answers
Just looking at you now
This is not what happens
When a love is about to die The rumour you're hearing
Is coming straight from me
It's a rumour to rely on
This is how it feels We're in the middle of it darling
It just occurred to me
I haven't thought about it darling
How it really feels
