

# I Think She Likes Me

Billy Gilman

I think she likes me  
And I know I like her  
It's kind of frightening  
'Cause it's too soon to be sure  
I think she likes me  
Maybe even might be love Should I be patient  
Or should I ask her straight out?  
That smile she gave me  
Don't leave too much room for doubt  
I think she likes me  
Maybe even might be love Our first kiss said more than good night  
I bet I've relived it a thousand times  
I can't predict what the future's gonna bring  
But those looks that she's been giving me can only mean one thing I think she likes me  
I think she might be the one  
And more than likely  
The best is still yet to come  
I think she likes me  
Maybe even might be love Our first kiss said more than good night  
I bet I've relived it a thousand times  
I can't predict what the future's gonna bring  
But those looks that she's been giving me can only mean one thing I think she likes me  
And I know I like her  
It's kind of frightening  
'Cause it's too soon to be sure  
I think she likes me  
Maybe even might be love I think she likes me  
Really really really really likes me  
I think she likes me I think she likes me  
Really really really really likes me  
I think she likes me I think she likes me  
Really really really really likes me  
Maybe even might be love I think she likes me  
Really really really really likes me  
I think she likes me I think she likes me  
Really really really really likes me  
I think she likes me
