

# The Way of Your World

## Destrophy

It's all been done before and  
No one can listen to anyone's answers  
They're drifting farther everyday  
And they say "We hold our hands to block the sun  
We blame the light for what we've done  
We look away so We'll forget what We've become"First take what you want  
Then you throw it away  
This is the way of their world  
Don't know what you've got  
Until it's taken away  
This is the way of your  
WorldWhen the night falls you know who you are  
And you cast reflections as the mirror gathers rust"It's so safe and lonely with you"  
Lovers ripping in two  
Grind away 'till nothing's left  
There's nothing left insideFirst take what you want  
Then you throw it away  
This is the way of their world  
Don't know what you've got  
Until it's taken away  
This is the way of your  
World  
Your lives will fade before their time  
And you'll never say goodbyeThe end of all the things you know  
And all of what you can be  
It's fading fast before youWhat we want, we are
