

Day Dreaming

Sonny Bama

No doubt I pushed you out
Made it seem like I was lookin out
So didn't have to live without
All the love and the dreams you had

Selfish me scored too low
Passive-aggressive Scorpio
Hold it in till it explodes
I built you up and down you go

I blamed my problems on your problems
I was so wrong
But now my problems are my problems
Cuz you're long gone

She wanted dream wedding, Baby carriage, Sippy cup
I'm headed to the dealership to buy a bigger truck

She wanted vacations, Date night and movie time
But I stay up late at night, this studio, these songs of mine

I'm not no knight in shining armor, never was, never will be
But I'll provide for us and I'll ride for us and I kill those lookin to kill me
I'm first to admit it mistakes were made
best believe I learn from them
In your mind your cake was made
Mr & Mrs's was the words on it

I've been daydreaming
Bout you leaving
It's all in my mind
You make it hard breathing
I cant live without you in my life

This world is so cold
People are low
It's hard to hold on
I just want to let go
I've been daydreaming
Bout you leaving

it's all in my mind

We fight for space
We fight for sound
We fight for finance

We fight for rights
We fight for love
we fight for our advances

We fight for words
We fight for life
and We gonna fight for chances

The world's our canvas
but it's infected so
we fight the cancer

I hold the hands to the lonely
She holds the key to my heart
I hold the world on my shoulders
so they can't keep us apart

So I fought
She packed her bags and left the other day
I try to get it out of my head but I can't get away
I spent my life in the fight
she's got a fight of her own
through all of the highs and the lows she never left me alone

I'm not no knight in shining armor
never was
never will be
But I'll provide for us and I'll ride for us and I kill those lookin to kill me
I'm first to admit it mistakes were made
best believe I learn from them
In my mind this song was made
I miss you were the words on it

I've been daydreaming
Bout you leaving
It's all in my mind
You make it hard breathing
I cant live without you in my life

This world is so cold

People are low
It's hard to hold on
I just want to let go
I've been daydreaming
Bout you leaving
it's all in my mind
