I Mostly Copy Other People

The Almost

So this is the time when you be what you just wanna be
I always thought this would come oh so naturally
I'm gonna do just what order me to do
So chase me, chase me, I'll run twelve
circles around you...
I'll make this way worse than you know

Ain't it a shame that they won't
remember all of this

Let's get, let's get it goin'
Make a mess way worse than you know
We'll beat this town black and blue
with my quick and easy flow...
They will ask us where we came from
Where's the place that we blew in from
I wanna make them like us
I wanna make them worship us...
It will make you feel like you're in love

Ain't it a shame that they won't
remember all of this
We're all just fakin' out with someone
Who tells us
What we should miss

More fake than you have ever been
More fake than you have ever spin spin
The truth gets a chance

We're all just fakin' out with someone
Who tells us
What we should miss

Don't tell me what to miss
Don't tell me what
