Lost My Mind

Hogzilla

With My Raincoat on
Its alright baby hold my hand
I aint tryin to be your man
Lets take it slow relax a little
Make it so its natural
As a matter of fact lets take it black
To the very first day I had your back
We shared a cab
Shared a laugh
Shared a glass and I kissed your ass
Kissed your lips, after class
We both had history after math
Passin notes
Teacher, askin for em,I read em out loud to the class like a poem or a rap
Say it like I mean it with by big toe tap
Head goin bop back and forth like
If you like what you here you can meet me out back..out back
Chorus
Wtih my raincoat on, in the heart of the sun
With my raincoat on, in the heart of the city, heart of the city ...
I la la lost my mind
I la la lost my lady
I la la lost my mind
But I lu lu love you baby
It crossed my mind that I lost my mind, I guess I should check back in sometime
Sometime, the perfect little world rhymes and sometimes it dont. fine.

Rewind repeat it three times if you mean it, I want a crib by the beach belive it so baby doll Im leavin, baby doll im leavin
Duffle bag filled with clothes, notebook filled with flows
Phonebook filled with hoes
My dope hook gone get me closed
My hope is what drives me toward
this future like a midnight double feature so how did i blow those tweetas in ya speakers.
Chorus again
Woke up at about noon just thought that I had to be in concert soon
To get my head lined up and a new tatoo, the blacker the berry the sweeter the juice
The black of the year shwayze's a fool, take you to school and pick you up too
Maybe I'd do anyting for you

Maybe I'd do anything for you
Maybe I'd do anything for you
Maybe I'd do anything for you
Would you do it for me?
I la la lost my mind(shes out tha door)
I la la lost my lady(shes out tha door)
I la la lost my mind(shes out da door)
But I lu lu love you baby (shes out da door)
I la la lost my mind
I la la lost my lady
I la la lost my mind
But I lu lu love you baby
I la la lost my mind
I la la lost my lady
I la la lost my mind
But I lu lu love you baby
