Gamemaster

Lost Tribe

Embracing the goddess energy within yourselves
Will bring all of you to a new understanding and valuing of life
A vision that inspires you to live and love on Planet Earth
Like a priceless jewel buried in dark layers of soil and stoneEarth radiates her brilliant beauty into the caverns of space and time
Perhaps you are aware of those who watch over your home
And experience it as a place to visit and play with reality
You are becoming aware of yourself as a game masterImagine Earth restored to her real beauty
Steady trees seem to brush the deep blue sky
The clouds billow to form majestic peaks
The songs of birds fill the airCreating a symphony upon symphony
The goddess is calling for an honoring
Of what she allows to be created
Through the form of strength and blood
Those who own the planet are learning about love
