

# Hold Back The Day

## DevilDriver

Dig deep dig in deeper you go where only fools fear to tread  
You'll find devices to kill your master why not kill your maker instead  
Leave it to the ones that own you leave it to those ones to  
Disown you put faith & trust in the dusk Do what you must do[Bridge]  
I'm getting edgy for those departed left all alone left still forgotten![Chorus]  
Miles to go and sky's to fly  
Hold back the day  
Miles to go and sky's to fly it's darkest before the DawnClaw hard now from your casket  
Six feet and getting deeper should the top,  
Soil feel Heavy it must be getting weaker Towers people build,  
Up in life become frail and fall to the ground  
Fuck them there opinion Deceiving the Honest Man![Bridge]ALways ,always ,darkest before the dawn[Chorus]
