The Landing

T3CHN0PH0B1A

High in the machines
Above the earth
We observe your lifeform
We've come for you
Riding the machines
We'll take your souls
Riding the machines
We've come to rule
About 400.000 years ago
When evolution was still on the make
And extraterrestial race
Appeared in our part of the galaxy
Heading straight to Earth
Riding the machines
We'll take your souls
Riding the machines
We've come for you
When they finally landed
They found a planet with perfect survival conditions
A lower lifeform called humans
Considered them as gods
From somewhere out of space
