

Green Light

Jamie Lidell

It's only a trick if you make it a trick
And you're wonderin' how to get yourself
Out of this one, out of this one, out of this one It's only a good thing if you make it a good thing
Once again you're just foolin' yourself
Out of this one, out of this one, out of this one Well, all you have to do is
Just give yourself the green light
Just give yourself the green light It's only a kiss if you make it a kiss
So why you wanna fake your way
Out of this one? Well, it's only a sin if you make it a sin
We all guilty so why not give in
To this one, oh to this one, oh to this one? All you have to do is
Just give yourself the green light
Just give yourself the green light Give yourself the green light
Give yourself the green light
Just give yourself the green light
Give yourself the green light Well, you're spinnin' your wheels
But you're goin' nowhere, keep on turnin'
But there's no turnin' back
Out of this one, out of this one, out of this one And you don't have to put on the brakes
When you're already there
'Cause there's this time to take yourself
Out of this one, out of this one, out of this one Yeah, and all you have to do is
Just give yourself the green light
Just give yourself the green light Give yourself the green light
Just give yourself the green light
Just give yourself the green light
Give yourself the green light
