

100 Mile Freefall

The Atomic Love Bombs

A hundred miles of emptiness
It's lonely here but I confess
That it feels so good Falling to the earth below
Warm myself in the sun's glow
And it feels so good Please don't leave me behind
Bailing out I'm panicked and resigned
I'm coming down again Spinning through the clouds and I
Watch the stars rise in the sky
And I close my eyes To think about my family
I know their down there watching me
And they close their eyes Please don't leave me behind
Bailing out I'm panicked and resigned
I'm coming down again I see you in the darkest sun
I know you're there I see you run
But I don't know why I've been bad and I've been good
You said you'd leave I knew you would
But I don't know why Please don't leave me behind
Bailing out I'm panicked and resigned
I'm coming down again Please don't leave me...
