

Call n' Return

Hellogoodbye

You promised me starry night skies
They just remind me of your shining bright eyes
I'm missing a voice at night time
Sepsa-separation seem seems a sad crime But don't, don't, don't think, think, think
I forgot you, you, you are, are, are
Oh, so sweet, I, I, I, I know If only you were here, things would be more magical
If I was there, right now would be more radical
You're so not near, I'm wishing I could place a call
And feel closer to you, oh The miles of air and road and land
That separate me from all my plans
Were havin', havin', havin', havin' fun
But somethin', somethin' tells me I miss someone But I hope, hope, hope you didn't
Forget me, I couldn't forget you
The whole time I always knew, I knew If only you were here, things would be more magical
If I was there, right now would be more radical
You're so not near, I'm wishing I could place a call
And feel closer to you, oh Say that you're into me
Just let me know how it will be
If you don't know, don't say so I'll wait till the perfect time
Think of all the perfect lines
I'll make sure if I let you know We've got movies on our list to see
Things to do, just you and me
Calls to make from here to there and back We've got fun to have and days to spend
Stars to see or just pretend
Listen now, just keep things right on track Say that you're into me
Let me know how it will be
If you don't know, don't say so I'll wait till the perfect time
Think of all the perfect lines
I'll make sure if I let you know Say that you're into me
Let me know how it will be
If you don't know, don't say so I'll wait till the perfect time
Think of all the perfect lines
I'll make sure if I let you know
