

Steer by the Stars

Karmakanic

On the life-long road,
It seems we know each curve
 Following its code
 with every tingling nerve
 And we know the way
 And it takes us there
We're looking for the lane that takes us off the highway
 Untrodden groundAnd we all
 Got an inner flame we sacrifice
 To that road
 To the way that says who we are
 Keep the flame alive
 Take the maps
 The plans and rules of sacrifice
 Keep it burning bright
 Screw them up
It's time to steer by the stars (x2)New horizon shine
 In all directions' skies
 So do we push for time
 or heading for the wild?
 And we argue then whether north or south
Or where to find the gold at the end of the rainbow
 While the colors pass us byAnd we all
 Got an inner flame we sacrifice
 To that road
 To the way that says who we are
 Keep the flame alive
 Take the maps
 The plans and rules of sacrifice
 Keep it burning bright
 Screw them up
It's time to steer by the stars (x2)And I know
 Got an inner flame of sacrifice
 To that road
 To the way that says who we are
 Keep the flame alive (x2)
 Keep it burning bright
We go to steer by the starsKeep the flame
 A bright night light

Keep it burning
It's burning brightAnd we all
Got an inner flame we sacrifice
To that road
To the way that says who we are
Keep the flame alive
Take the maps
The plans and rules of sacrifice
Keep it burning bright
Screw them up
Steer by the starsAnd we all
Got an inner flame we sacrifice
To that road
To the way that says who we are
Keep the flame alive
Take the maps
The plans and rules of sacrifice
Keep it burning bright
Screw them up
It's time to steer by the stars
