

# Days of America

## BlackHawk

HeyThe furnace burns in steel town  
Big business came and tried to shut 'em down  
The workers got together and they bought that mill  
They're making steel in Pittsburgh stillThe family farm down in Indiana  
The bank's foreclosin' just because they can  
And the farmer can't do nothin' 'bout another drought  
Sir John, Waylon and Willie came and helped 'em outThese are the days of America  
Brother to brother, hand in hand  
These are the days of America  
Walking together in the promise landThe wheels in Detroit keep on turnin'  
A blue collar lesson there for the learnin'  
The throttle drives you anywhere no matter how far  
Just never give up on who you are'Cause these are the days of America  
Brother to brother, hand in hand  
Well these are the days of America  
Walking together through the promise landRight down the middle of America  
Where her heart beats strong and true  
You look up, just open your eyes  
The flag still waves and the eagle still fliesThese are the days of America  
Brother to brother, hand in hand  
These are the days of America  
Walking together in the promise landThese are the days  
Yeah, these are the days of America  
These are the days  
Yeah, these are the days of America
