

Fight or Flight

Bracken

We're ready to go Ticking like a bomb that's about to blow
It's taking control Pulling at your feet like an
undertow You don't really know

If you're all that capable But you've been told Don't pretend you're stupid
Figure it out Sort it out Go make yourself useful
You're better than dead You really made a mess with the words you said
So easily fed

The flames of the fire rise above your head They want to be led
You've joined the ranks instead There's a voice in your head
I can't figure it out Any more than the generation
before me I can't figure it out How we got where we are today
I can't figure it out Any more than the generation before me
I can't figure it out We've got to fight not to fade away
