In Space

Cannabinoid

The moon is old, all dusty craters
Fear and panic, orbit Mars
Saturn's dark side rings
Are just plain beautiful
Back on earth you're waking up soon
Stretching in the morning light
No celestial body
Could compare to you
And even though
I'd always dreamed of
Going to the stars
In space, what I think about is
You and me and atmosphere
This place is terrible and endless
Counting moon rocks for the cause
Just me in a little pod
I can't wait for gravity to bring you close to me
All I've got's this little window
Never lets me see too much
I bet the leaves are changing
There again
The solar winds to zero kelvin
I'm hurdling and pressurized
If only I could get a breath of you
And even though
I'd always dreamed of
Going to the stars
In space, what I think about is
You and me and atmosphere
This place is terrible and endless
Counting moon rocks for the cause
Just me in a little pod
I can't wait for gravity to bring you close to me
I hope this message finds you
And you won't feel so alone
Even if I never make it home
In space, what I think about is
You and me and atmosphere
In space, you're picture's all I look at

My place, is written below
Watch the leaves change in the yard
Dreaming of the stars
I can't wait for gravity to bring me home
