Always Overcome

Ilse DeLange

Like the sun at my window
In the morning when I wake
I am taken without warning
By the light in your faceSometimes it scares me darling
This feeling of constant ache
As if you came much closer
My heart would surely breakIt never ceases to amaze me
When it's said and done
After all this time when I am with you
I am always overcomeUsed to feel like I was drifting
Always in and out of love
Ever since you've been with me
I can't stand to leave your armsIt never ceases to amaze me
When it's said and done
After all this time when I am with you
I am always overcomeAll this love
All these years
Made my life something realIf I had never found you
Don't think I would believe
Love so strong could surround me
That I could lift me off my kneesIt never ceases to amaze me
When it's said and done
After all this time when I am with you
I am always overcomeAll this love
All these years
Made my life something real
