

A Little Bit Better

Mac McAnally

Just a little bit better
I want to say
I want to be just a little bit better
Each and every day
And it really don't matter
How good or bad you feel
You're gonna find that a little bit better
Is a real big deal Walkin' down the road, I saw a man
A smile on his face and a hammer in his hand
He seemed so happy just a swingin' away
I thought to myself, I wanna be that way Just a little bit better
I want to say
I want to be just a little bit better
Each and every day
And it really don't matter
How good or bad you feel
You're gonna find that a little bit better
Is a real big deal Yeah a whole lotta people
They want to sit around and cry
Oh, they don't change nothin'
And nothing ever changes
And they don't know why So baby tonight when I hit that door
I want to be something that's a little bit more
And a little less dark and a little more light
Try a little harder and things just might Get a little bit better
I want to say
I want to be just a little bit better
Each and every day
You know it really don't matter
How good or bad you feel
You're gonna find that a little bit better
Is a real big deal Just a little bit better
Ah just a little bit
Oh
