

Who Will Stop the Rain

Asia

This problem is insoluble
The answers seem impossible
The logic ceases to exit
Emotion is the beat we miss I stand on a world
Where dreams, realities, existence are the same
We take from our mother's skin
But the world is not to blame [Chorus]
Who tells the wind which way to blow ?
I wonder who will stop the rain
The rocks that hold the secrets, they don't know
So who can stop the rain ?
We've lost the path for all we know
Now tell me when will it start again ?
And as the old man lifts his hands
Please can you stop the rain Stars fall far away
Like they never did before
A new moon shining
Like it never will again [Chorus] Desert white cloud
Spirits they sing
Rain falls from the big sky
Onto broken wing There is no sense in turning back
To wash the dÃ©bris from the track
World without reason without rhyme
We fought for peace within our time [Chorus]
