Swimming Pool

Freezepop

late at nite, the air was cool
we snuck into the swimming pool
you dove headfirst, I waded in
the scent of chlorine upon our skin

the stars were bright, the water clear
I felt your heat as you swam near
I held my breath, you held my hand
moving away, further from land
the moon was full, everything blue
the water stilled, reflecting you
floating right here with you next to me
gazing at stars, we drift silently

late at nite, the air was cool
we snuck into the swimming pool
I went under and you followed
let's not think about tomorrow

everything is perfect now (8x)
everything is perfect now (I held my breath)
everything is perfect now (you held my hand)
everything is perfect now (moving away)
everything is perfect now (further from land)
everything is perfect now (the stars were bright)
everything is perfect now (the water clear)
everything is perfect now (I felt your heat)
everything is perfect now (as you swam near)
everything is perfect now (4x)
