

# Go Outside

## Cults

I really want to go out  
I really want to go outside and stop to see your day  
You really want to hole up  
You really want to stay inside and sleep the light away I really want to go out  
I really want to go outside and make it light all day  
You really want to hole up  
You really want to stay inside and not care where you lay Well I know what's good  
Exactly cause I have been there before  
Yeah I know what's good  
Exactly those things night cannot behold I really want to go out  
I really want to go outside and stop to see your day  
You really want to hole up  
You really want to stay inside and sleep the light away I think it's good to go out  
cause if you don't you'll never make a memory that will stay  
I think that you should wake up  
I think I want to live my life and you're just in my way
