

# Walk With Me

[Cher](#)

Standing all alone inside a crowd  
Someone comes along and pulls you out  
You smile at the chance  
But deep inside, you hide your heart again Walk with me, take my hand and walk with me  
You can count on me through your troubled times  
I'll be for you what you've been for me  
Oh, walk with me, understand, oh, walk with me Standing all alone, so down and out  
It's easy to forget what life's about  
But you know I'm your cure  
So wear that smile we need to see us through Walk with me, take my hand and walk with me  
You can count on me through your troubled times  
I'll be for you what you've been for me  
Oh, walk with me, understand, oh, walk with me Baby, baby, I am here  
When you can't see me, see me through your tears  
Feel me, feel me make it real for you  
And you'll make it, baby Walk with me, take my hand and walk with me  
You can count on me through your troubled times  
I'll be for you what you've been for me  
Oh, walk with me, understand Walk with me, take my hand and walk with me  
Walk with me, understand, oh, walk with me  
You can walk with me, take my hand and walk with me  
You can walk with me
