

Face Down

Modern Skirts

Let down and not amused
You walk in and wonder what to do when youre famous in a small room
You decided to leave with a card up your sleeve Taking photographs of her when youre bad on a bender
Is why it took some time to remember
She was keeping you calm, you were calm all along You bought a place outside of town
Her picture lays face down You took a cab from the club and the ride wasnt easy
She wouldnt settle down and you were dizzy
When it started to pour, you washed up at her door A little place outside of town, your picture lays face down Let
down and unamused
You walk in and wonder what to do when youre famous
