Little One

Chicago

Oh little one, it's so nice to have you near me
To feel once again the love you bring here
Oh my little one, I am sorry for the pain you've felt
Say the word and daddy will make it disappearOh little one, bring your love here
Oh little one, I need you near
Oh little one, but don't live in fear of the future
'Cause I will always be thereOh little one music is my life, I hope you understand
Traveling on the road with me you can see the way we live
Oh little one, I will always cherish these days with you
As time goes by I hope you can see the love I tried to giveOh little one let your love flow
Oh precious one like a flower you'll grow
Little one someday you'll have your own little one
And you will always be there, rightLittle one, it's so nice to have you near me
To feel once again the love and you bring here to me
Oh little one, I am sorry for the pain you've felt
Say the word and daddy will make it disappearOh little one, bring your love here
Oh little one, I need you near
My little one, don't live in fear of the future
'Cause I will always be thereOh little one, let your love flow
Oh precious one like a flower you'll grow
Little one someday you'll have your own little one
And you will always be there, oh yeahMy little one
My little one
My little oneMy little one
My little one
My little oneMy little one
My little one
My little one
