

# The Landing

## Duster

High in the machines  
Above the earth  
We observe your lifeform  
We've come for you  
Riding the machines  
We'll take your souls  
Riding the machines  
We've come to rule  
About 400.000 years ago  
When evolution was still on the make  
And extraterrestrial race  
Appeared in our part of the galaxy  
Heading straight to Earth  
Riding the machines  
We'll take your souls  
Riding the machines  
We've come for you  
When they finally landed  
They found a planet with perfect survival conditions  
A lower lifeform called humans  
Considered them as gods  
From somewhere out of space
