I Follow You

Melody's Echo Chamber

I was wrong and you were cold
I was hoping you might go
You would never show me how
much you cared
what was going on

I follow you
Pretend you want me to
Living/Leaving a test
Locked up with you

I know you trust me enough
That I was stupid then
The things i always do
with you
Our love was new

It's been too long since you are gone
I am thinking of you alone
You would never show me how
much you scared of
What was going on

I follow you
Pretend you need me to
Living a test
Locked up with you
I know you trust me enough
But I do stupid things
The things i always do

Our love was new

I
need
someone
to
be
close
forever
