

Sail On Through

S Club 8

Well if I could stay with you night and day, I would.
But we're miles apart don't know where to start, no way.
As winter's turning into spring, don't know what life is gonna bring today.

I'm sure we'll be ok,
And I cannot wait 'til we're back together,
Love conquers all kinds of weather
And when you're true to what you believe,
We'll sail on through.

Well if I could say, I'd be back some day would you wait?
(would you wait, would you wait)

I can't bear the thought that your heart's with someone else.

And spring has gone and summer's here, I feel there's nothing else to fear because, I know you'll be there soon
And I cannot wait till we're back together, love conquers all kinds of weather, when you're true to what you
believe we'll sail on through, when you're true to what you believe we'll sail on through.

Lalalalala...lalalala x 4

And spring has gone and summer's here, I feel there's nothing else to fear because I know you'll be here soon,
And I cannot wait till we're back together, love conquers all kinds of weather, when you're true to what you
believe, we'll sail on through, and when you're true to what you believe we'll sail on through.
