# Golden Wave

## Thomas Azier

If she could only feel what I feel now
I would never feel apart
But if Love is just not good enough
What If I never reach her heartWe are together, floating into space
We are together, riding the Golden WaveDays are only filled with darkness here
And nights are only filled with lust
Give me a reason to get out of here
Too many reasons to get lost
We are together, floating into space
We are together, riding the Golden WaveWe are together computing away
