Take it In

The Waifs

now she's thinking of the red soil and those mango trees
well in her mind she's still splashing round down on cable beach
and her eyes are as rich and as far away
as the sunset there
but she's not taking in a word i say
so i might as well be talking to my selftake it in, take it all in
now is the time that will not come again
take it in take it all in
this is the day and its here for the livingso we stepped out side into this melbourne weather
and with a shock it brings her back to where she is
well now we've made this place our home
surrounded by unknown
we're gonna stick it out
until it comes togethertake it in, take it all in
now is the time that will not come again
take it in take it all in
this is the day and its here for the livingwe're only living for a day or some days gone by
you'll take it in each moment
never notice what you had until it passed you by, passed you byso take it in, take it all in
now is the time that will not come again
take it in take it all in
this is the day and its here for the livingtake it all in
now is the time that will not come again
takle it in yeah yeah (take it all in) take it all in
(this is the day that is here for the living)
this is the day and its here for the living
