

Beauty

Galactic Pegasus

Now if it takes a lifetime
I'll show you a worry-less mind

And if you haven't fallen into a great, guiltless dream
(Return to sleep)

you should rethink

Everything

(Never Ending)

I thought that if you slept you would only dream about me

Tell me your secrets

I swear I'll keep it safe

All we are is shattered remains
Photos of when we felt the same

Tell me your secrets

I swear I'll keep it

These years have been a test
We could have become anything

With endless potential

Counting down the time we can't escape

If it takes a lifetime

I thought that if you slept you would only dream about me

Tell me your secrets

I swear I'll keep it safe

Slowly the clock rolls

Upon the mantle

Next to photographs

And they're looks you cannot handle

Take my hand my gladly

There is no need to fear

Don't think that forever is measured in years

If it takes a lifetime

I'll show you a worry-less mind

Lift me up so we may touch the sky so blue

oceans below open up to swallow you
To swallow you
