

I Want You

Floetry

Baby I've made my decision
It's you, you're the one
There's nothing else that needs to happen
I want you, I want you
Baby, baby
I'm excited that you're here
You're invited into me
Take it slowly, take it baby, take me
I've come to my realization
I'm ready, full of compromise
It's cool with me, now you can go through
What you need to go through
Because I want you, baby I want you
You, I want you, I want you
I want you, I want you
Baby, baby, I'm on fire
Your caress takes me higher
I can't control it, can't keep quiet
And I don't want to make me louder
Make me baby, I'm here
I'm ready for anything
What's your call? I'm your soldier
Your lover, your child's mother
And I want you
You, I want you, I want you
I want you, I want you
I want you, I want you
There's more out here than just what you know baby
And I want you, you know how to be a man
But there's a whole additional mindset
I want you
I'm a manifestation of the divine mother
You're a manifestation of the divine father
We are two in the same so can you say my name?
I want you
You, I want you, I want you
I want you, I want you
I want you, I want you
I want you, I want you

It's time baby, it's time for you to listen
To the things you don't understand
I know you, you wanna be a man
I know you, you are a god man
Then listen to me baby
I have the answers to the questions you're asking me baby
Do you know that you don't know?
Then let me show you, if you could hear me
This is more than just what you've learnt
You need to be a master now
Let's apply it, let's apply it
Listen baby, just be it
No more talk, just be it
Be responsible, I am who I say I am
