The Difference Between Us

Cuff the Duke

If you really love me
Don't try and change me
When you look in the mirror
It's not me you see
I don't want your choice as mine
No, I'll never cross that line
I want you just the way you are
'Cause boy, you're everything I'm not
And that's all I've ever wanted
If we ever come close, if we ever discover
How to hold on and keep our faith in each other
The difference between us
Will keep us together
If we open our eyes don't look any further
'Cause we've found all we'll ever need in each other
The difference between us
Will keep us together
I tell you our love is everlasting
You promise to give your best every morning
We don't have to compromise
Try to live each other's lives
We can be ourselves tonight
If we ever come close, if we ever discover
How to hold on and keep our faith in each other
The difference between us
Will keep us together
If we open our eyes don't look any further
'Cause we've found all we'll ever need in each other
The difference between us
Will keep us together
So don't forget the words I've said
There's nothing there I might regret
No, don't play games inside your head
What's going on inside your head?
No no no
If we ever come close, if we ever discover
How to hold on and keep our faith in each other
The difference between us
Will keep us together

(I'll keep you here, right by my side)
If we ever come close, if we ever discover
How to hold on and keep our faith in each other
The difference between us
Will keep us together
If we open our eyes don't look any further
'Cause we've found all we'll ever need in each other
The difference between us
Will keep us together
(I'll keep you here, right by my side)
If we ever come close, if we ever discover
How to hold on and keep our faith in each other
The difference between us
Will keep us together
(I'll keep you here, right by my side)
