

# Kiss Off (Acoustic)

## Gasoline Heart

Now it's your turn to leave behind the sunshine  
Go and find yourself a good time  
Be it New York or L.A. With all these rumors, war's been instigated  
Embrace my kiss, don't waste it  
Sing because you still can And make me beautiful  
And make me beautiful Now what would you ask if you had her ear  
And one chance to let it fly and take your stand  
For New York and L.A. Where's your passion, where is your soul?  
Don't give up and I won't let go  
We will rest when we are free And make me beautiful  
And make me beautiful Oh, some boys got it good  
Young hearts do what they should  
Their dreams don't die, their girls don't lie  
Oh, some boys got it good Here we go  
Oh, some boys got it good  
Young hearts do what they should  
Their dreams don't die, their girls don't lie  
Oh, some boys got it good
