One More Thing I Love

Oh No Not Stereo

By the way we love you California
And with your smile you really get me all the way
Well if there's one more thing I love
Well that gets me really gets me
in the sun you really get me all the wayThe time is coming up
when did you all get so down
when I've been up to this town?
The very very last one
when are you ever gonna get around
and I've been back, ooh...By the way we love you California
And with your smile you really get me all the way
Well if there's one more thing I love
Well that gets me really gets me
in the sun you really get me all the wayKeep me on this running train
when all our eyes are open
we'd survived
we always get by
looking at the ocean view
all the cities teach you how to
find a way to give me to my home
would it break your heart
suddenly you'll fill the eyes
until you just survived
you always get by
