The Rhyme Scheme

Cursive

words have no feeling meanings are meant for without loaded meanings words take too long to come across defining definitions we load them for effect it's cheap but it's working i could never please you it's the best I've got to get your attention these verses are wasted on words you'll never hear i could never get your attention on words you won't relate to it's not working- i don't feel any better i don't feel so well the verbal breakdown has failed so I'm whispering secrets hush, hush on the loudspeaker words sculpted on verse but it's the best i've got to get your attention i could never get your attention become absurd i could never please you words so sympathetic symphonic, yet- pathetic are tossed on to the song the meaning is lost words just wont work words are slowly demeaning their meanings words make things worse losing their feeling these words failed words are always repeating words fail
