Invisible

Jason Chen

Ever felt so close, and yet you're so far away
Ever went down the wrong, road
Well if i got to go back, there's only one way
Is if you're coming with me,
I'm waiting for youI've been standing here with my arms out wide
but you just keep on passing me by
I can change your life forever, if you would just give me timeBaby love is staring right at you
but to you I'm invisible
I can make your heart feel brand new
do you even notice me at all
its like I'm invisibleEveryone's heart is broken
baby nowadays
Cold shoulder you're frozen
Zero degrees
All of your love was stolen
I can replace, everything that's missing
if you let me inBridge:
Let's save each other from this cold cold world
promise ill go anywhere you wanna go
seal it with a kiss on my lips lemme know I'm not invisibleand we'll just runaway x 8
