

Inside You

Pop Will Eat Itself

Love's just the word for boy meets girl when you know it's fear we've found
You're scared of me and I'm scared of you - we'll never get by without it
The things I do that don't include you, sometimes it grinds you down
I know you'd do anything just to have me around[CHORUS]
I never say I love you, I don't think you expect me to
But there's no mistaking that special feeling when I'm inside you
When I'm inside you The fear goes round till it goes bust, it's all so sad about us
The things you've learnt with your fingers burnt
Is nothing changes nothing much[CHORUS]
