

This Time Around

Cheap Trick

Never look back but now never lose sight
Of your past, oh no
Change every moment knowing your decisions
They just won't last, oh no Well it's different this time around
I won't look back 'cause I found
That gone are the days, long cold nights
It feels like turning this time around Always a danger of falling into
A mindless shell, oh yeah
Come out of your shell don't fall into a trap
You can't get out
(Can't get out, can't get out) Well it's different this time around
I won't look back 'cause I found
That gone are the days, long cold nights
It feels like turning this time around When it hurts that bad
You know my temperature rises
It never goes down
It's goin' up, straight up When it hurts that bad
You know my temperature rises
Oh it never goes down
It's goin' up, straight up, straight up Gone are the days, long cold nights
It feels like turning this time around, oh yeah It's different this time around
I won't look back 'cause I found
That gone are the days, long cold nights
It feels like turning this time around It's different this time around
I won't look back 'cause I found
That gone are the days, long cold nights
