Never Forget Pluto

CYNE

Remember Pluto, was a planet but now it's Psuedo
Funny how evolution changes the facts that you know
Everything is relative, how you see it as evidence that
Nothing's forever but never forget heaven cus hell
is all around, yelling into the crowd of trouble will sound
with the sound liver than loud frown shot
into the the air the angsta broke bloaks with no hope
wishin on a star that God's close, give me a witness
or a camera with former pictures of Micheal Ridges
calling all of my people niggas, So does it shock you?
That this mission is still impossible, apology not accepted
but hey Kramer I'm proud of you, for showing the world
we still in this shit, and every day is struggle with people acting like this
So stand up, it was the smallest on the list but Pluto was a planet and I'll never forget
