

If You Fall

ShortBus

Let's talk and we'll fill the air with imagery that lasts forever
So this is love that's a lovely thought
You have to care for it to keep it together
If you fall will you get up
You're stuck in a dream will you wake up
And if you fell in love will you hold on to it
And if it's cold will you stay warm
You drift too far will you swim towards the shore
And if you fell in love will you hold on to it
Let's just sing and we'll fill the air with melodies that blend together
You speak so sweet with words so delicate
A glass I hope will never shatter
If you fall will you get up
You're stuck in a dream will you wake up
And if you fell in love will you hold on to it
And if it's cold will you stay warm
You drift too far will you swim towards the shore
And if you fell in love will you hold on to it
