

# I Laugh As I Chew

O.L.D.

When we were young - it was only a game  
You would win - at everything  
Childhood rivalry - developed and grew  
Games became battles - the I would always lose  
Now you're a big shot - controlling my life  
Causing me nothing - but pain and strife  
But I know your weakness - you haven't a friend  
Except from your puppy - who soon will be dead  
Here is your puppy's head  
Your only friend - bloody red  
It's all your fault - it is dead  
Tides have turned - now you lose  
If you want the rest  
It's too late - there's nothing left  
Mangled poodle - makes good stew  
I ruined your life - I laugh as I chew
