

Perfect Sence

98 Mute

uh huh, yeah, yeah, uh huh, ohhh yeah [1st Verse] If I'm chillin with you girl You like to run and I like to chill
Every second that I have you I know I will (huh) Spend it with you You're into movies and resturants, and
that's ok Because I like it that way But I spending nights with you is what I want People say that it won't work
We're not compatable As long as we're here on this earth We will be inseparable [Chorus] You, me, different as
night and day All we ever hear them say Makes perfect sense to me What seems to be totally illogical Still we
are tied at the heart It's completely and totally illogical We might be light years apart But it makes perfect sense
to me [2nd Verse] You like to go on exotic cruises To caribbean islands Sip margarita's on a beach in Mexico
(oh oh oh) I like to go walking underneath the stars You and me holding hands Moon shining down on We
understand we got a plan If that's wherever you are It's where I wanna go (it's where I wanna go) Don't you
know They can believe what they will We'll prove them wrong Come hell or high water alone And still be
strong All we ever hear them say [Chorus] What seems to be totally illogical You, me, different as night and
day Makes perfect sense to me Still we are tied at the heart It's completely and totally illogical We might be
light years apart But it makes perfect sense to me I always heard that opposites attract You and I are living proof
no matter what [Bridge] Ooh yeah Loves survives after all You, me, different as night and day [Chorus] All we
ever hear them say What seems to be totally illogical Makes perfect sense to me We might be light years apart
It's completely and totally illogical Still we are tied at the heart But it makes perfect sense to me [Chorus] You,
me, different as night and day What seems to be totally illogical All we ever hear them say Makes perfect sense
to me We might be light years apart It's completely and totally illogical Still we are tied at the heart But it
makes perfect sense to me, yeah
