

# **Inferno**

## **Flower Leperds**

The result of a failure

Genetic error

A system out of control

Creative energy

Transformed into hatred

A twisted perception of truthMankind breeds mortality

Sickness passes on through generations

The effect shows through genocideMalfunctioning mindsA bite of the fruit

Termination activatedThis creation once destined for success

Now violated and raped by one

Given access to the heartland

Evil dominion over their spiritsDivorced from it's creator

Crying out
